

Pro/DESKTOP 8	Summary of Fixes in Service Pack 2
	Graphics acceleration off by default
	No conflict with Pro/ENGINEER (registry problem)
	Defect 1.1 - Save to floppy
	Defect 1.2 - Converting an straight into an arc
	Defect 1.4 - Deform face
	Defect 1.5 - Section view letters
	Defect 1.6 - BS308 drafting standard issue
	Defect 1.9 - Twisted Loft
	Defect 996008 - Separation Bar
	Defect 804449 - In a assembly both models highlight when trying to select a single model
	Defect 1059038 - Pro/DESKTOP 8.0 documentation wrongly
	Defect 1001615 - 5 star and hexagon sketched of palette are not shown filled
	Defect 967541 - Making a projection of an edge formed by a draft onto a plane makes it incorrectly
	Defect 1096362 - After exporting to STL the export file is empty
	Defect 714466 - Translators - default precision of .stl and .wrl file produces unduly large files
	Defect 1051052 - animation between two config runs for a while and gives no results
	Defect 1047616 - In Windows XP if the regional settings are set so that a comma is used as the decimal symbol. When attempting to create a hole using Feature>Insert>Hole the Standard Data File cannot be accessed
	Defect 1038143 - New mass- property calculation functionality gives the same result when attempting to compute mass properties of parts at the assembly level
	Defect 828464- Interference does not work when selecting models from subassemblies
	Defect 1079163 - Mate constraints are lost
	Defect 1.7 - Inversion of assembly
	Defect 997241 - Two components with different material, assembled shows the same material.
	Defect 1095131 - unable to import Pro/ENGINEER part file. Error message displays only dot.
	Defect 1084381 - Pro/D display warning dialog box when import Pro/E file.
	Defect 1094335 - When files saved or created in Pro/E Wildfire M180 are opened in Pro/D 8, Pro/D crashes
	Defect 983370 - Pro/D failed to load a prt.file
